

PRODUCT INFORMATION:

GLOBAL LOGISTICS NETWORK™ (GLN)

HELPING CUSTOMERS DELIVER™

DESCARTES GLOBAL LOGISTICS NETWORK™

The Descartes Global Logistics Network (GLN) is a multimodal network of transportation providers and their customers that facilitates the interchange of logistics information and provides services that leverage that information to help enterprises conduct logistics business more effectively.

Designed specifically for logistics processes and their users, yet able to handle all standards and message specifications for manufacturers, retailers and distributors, the Descartes GLN is differentiated by its management of data semantics, message delivery and transformation of data pertaining to regional or global operations. It helps companies conduct logistics business more efficiently and effectively by helping them gain control of global inbound and outbound shipments and transform logistics focus from cost and asset centric to profit and customer centric.

GET CONNECTED. GET RESULTS.

The Descartes GLN enables the world's leading transportation providers to connect to their trading partners and seamlessly and reliably exchange information to help drive delivery performance and high levels of customer satisfaction.

The Descartes Global Logistics Network (GLN) is the definitive electronic communication service for logistics and supply chain trading partners. The Descartes GLN connects thousands of shippers with 90+ air, 30+ ocean, and 1600+ truck carriers, along with regulatory agencies such as the Federal Maritime Commission and U.S., Canadian, Dutch and Indian customs agencies.

SOLUTIONS & SERVICES

Bookings & Reservations. Centralized booking portals provide visibility into rates, contracts, and shipment details from global locations to enable more informed decision-making and contract development. Carriers can distribute product, routing, capacity and rate information to forwarders 24/7 in real time, while forwarders can access carrier information and make electronic bookings via a simple web browser.

Messaging. Features one of the largest networks of connected transportation and logistics service providers, including 90+ Air, 30+ ocean, 1600+ truck and regulatory agencies (Federal Maritime Commission and Customs).

Local Haulage/Interline. Helps third-party logistics providers (3PLs), freight forwarders, ocean carriers and intermodal marketing corporations (IMCs) manage their dray haulers and cartage agents more efficiently.

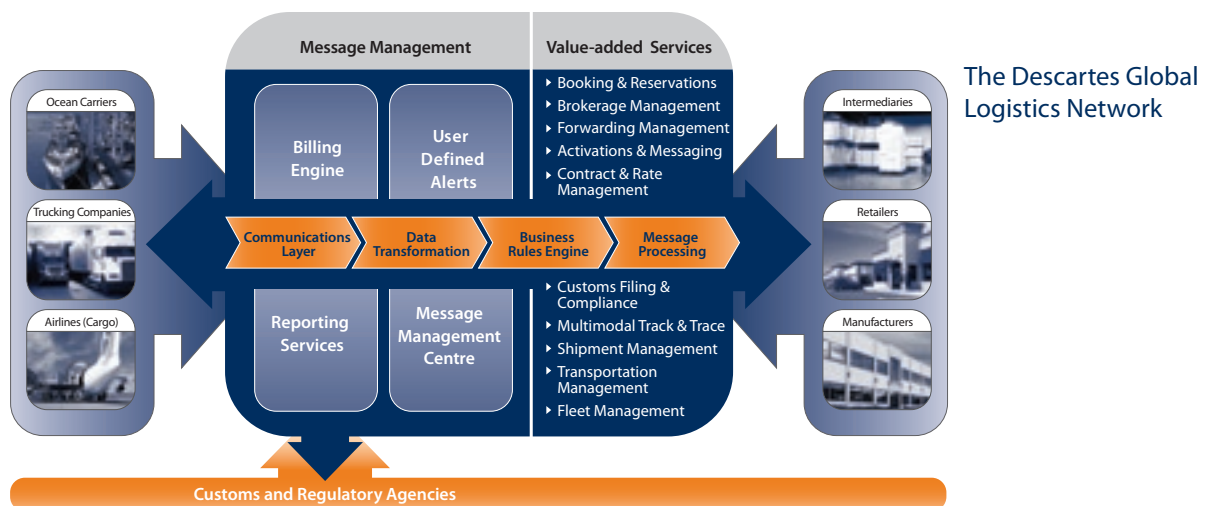

Rate Management. Helps companies more easily manage their global rate-making processes and provides companies with the ability to use their own data in their own format to effectively create and manage quoting and contracting procedures.

Customs Filing & Compliance — Cross-Border Services. Descartes Compliance Services help companies meet regulatory requirements for international shipments for both international customs agencies and security initiatives.

Multimodal Track & Trace. Provides a low cost, easy-to-deploy shipment status service that leverages Descartes' extensive network of transportation and logistics services providers.

Shipment Management. Allows transportation and logistics service providers to offer house-branded, value-added supply chain event management services to their manufacturing and retail customers.

Fleet Management. Offers a wide array of on-demand transportation management services for private fleets.

THE DESCARTES DIFFERENCE

The Descartes Systems Group Inc. (TSX: DSG) (NASDAQ: DSGX), a leading provider of software-as-a-service logistics solutions, is delivering results across the globe today for organizations that operate logistics intensive businesses. Descartes' logistics management solutions provide messaging services between logistics trading partners, "book-to-bill" services of contract carriers and private fleet management services for organizations of all sizes. These solutions and services help Descartes' customers reduce administrative costs, billing cycles, fleet size, contract carrier costs, and mileage driven and improve pick up and delivery reliability.
